## About the Programme

- ✓ Manufacturing strategy allows creating cohesive unidirectional efforts to ease the competitive pressure. The programme shall discuss how to create cohesive efforts to achieve the maximum performance.
- ✓ Manufacturing management is all about decisions that are short term as well as long term. The programme shall discuss long-term decisions that are strategic in nature and are very costly, time-consuming, and difficult to revoke.
- ✓ The programme shall deliberate on impact of different customer requirements on the manufacturing performance and the necessary actions required.
- ✓ The programme shall highlight the strategic understanding of manufacturing from its first principle for better decision-making process from the organization as well as from the supply chain perspective.

## Coverage

Case study-based learning methodology. The manufacturing case examples from the HBR will be discussed to highlight the strategic decision-making process. The course shall discuss:

1

Manufacturing systems and their characteristics

4

Compatibility of manufacturing decisions

2

Elements of manufacturing strategy

5

Manufacturing capability analysis

3

The process of manufacturing strategy

6

HBR Case Studies.

## Objectives of the Program

To discuss and illustrate strategic approach to management of manufacturing decisions based on real-life cases to enhance overall business competitiveness.

### The specific objectives include:

- Step by step, a clear understanding of manufacturing system.
- Better understanding of manufacturing decisions for competitiveness.
- Recognize - Competitiveness based on manufacturing function.
- To maximize the manufacturing performance.

**Course Coverage:** 15 Hours (3 Hrs per Day)

**Time:** 4.00 pm to 7.00 pm (February 22-26, 2021)

**Mode of Delivery:** Online (Link shall be shared)

# **Certificates** will be provided

**Registration Fees:** ₹ 9,027 (including GST @18 %)

**Course Registration Link:** (Programme code - 1 21 4 12)
