The proposed course is unique which incorporates both theory and practice. Since BBS is based on the observations in the field, the participants will have to make field observations with respect to both safe and unsafe behaviours. The course is divided in to 3 modules:

- 1. Module 1** – It covers the introductory part of BBS and procedure to record all the observations on a weekly basis. Module 1 is spread over 2 days of contact classes followed by 4 weeks of field observations from the respective industries/firms/organisations.
- 2. Module 2** – It covers the goal setting for the observed data and analysis of the observed data and sharing the same with the participating organisations. Module 2 is spread over 2 days of contact classes followed by 4 weeks of field observations. Case study discussion by industry experts and presentation by the group and allocation of mentors.
- 3. Module 3** – It covers the goal attainment for the parameters of the observed data for the entire duration of 12 weeks. Group presentations by the participants and sharing their experiences along with action plan for short term, medium term, and long-term goal attainment.

Program review and feedback from the participants, evaluation of the course by conducting MCQ test followed by Valedictory program.

Who can attend: Employees working in any industry/organisation having more than 2 years of experience, preference would be given to those employees who are part of BBS

implementation team in their respective organisation. Anyone who is interested in BBS implementation in their industry/organisation/firm can also participate.

Course fee: Rs. 8300.00 plus 18% GST rounded to Rs. 9800.00 per participant, group discount of 10% on Participant Fees for 3 and more members from same organization/industry/institute.
