

NITIE today successfully organized the online session on Role of Robotic Systems in Ecommerce by Prof Debjit Roy from IIMA. Prof Debjit deliberated on the contemporary issue of online shopping in context of e commerce space. He touched the very pertinent questions related to delivery, efficiency, and time management in the online delivery systems. He highlighted the need of efficiency and safety in the pandemic times and how automation and robotic solutions can be harnessed to achieve both. Prof Roy coupled the role of e commerce in today's context with the concepts of order management. He however, laid thrust on the need of flexible distribution centres/systems and the challenges associated with this mechanism. Human Robot Collaboration was the highlight of the session whereby the speaker showed various lines of action on the two and the how it can be leveraged to get maximum efficiency and business growth. In all, it was an engrossing session on business efficiency and robotic systems in ECOMMERCE domain. # Solving for India
